

# Star-Plus

8.4 Features – July 2025

## Help Bot

Your AI assistant for all Star-Plus questions.

## Store Layout App

New app to create store layouts and view heatmaps.

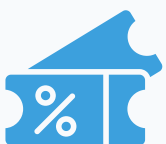

## Star-Plus Delivery

New Android app replaces old Delivery Orders system.

## Cash Drawer Setup

Automatic Cash Drawer selection by day and shift.

## 8112 Wizard

Helps stores sign up for GS1 8112 coupons on their own.

## Enhanced Till Product Search

- Case-sensitive search by description
- New “Combined Code” search for barcodes and codes
- View item comments directly
- Quick access to Item Editor

## Menu Login Improvements

- View password on login to help troubleshoot issues

## Label Program Upgrades

- Load only items with price changes
- Support for more barcode lengths
- Prevent scan errors in label quantity field

## New Hardware Support

- Custom P-Ranger RP310
- Zebra MP7001 USB Scale/Scanner

## Report Description Field Update

- Field length increased from 50 to 100 characters in Item Editor and Product Manager

## Add Apps & Websites to Menu

- Add user-defined programs or URLs as menu buttons
- Improves training and enhances security

## 24Seven Ordering Enhancements

- Deleted items now uploaded to 24Seven
- Limit retries with Maximum Download Attempts

## + Dozens of Other New Features

## Deprecated Features

### Old TLS Ciphers

Star-Plus 8.4 now requires TLS 1.2+ for all external HTTPS connections and uses BoringSSL for inter-server encryption to enhance security and prevent downgrade attacks.

### RF/Telnet Changes

Port 23 is no longer supported for Telnet or RF devices; stores should switch to the Star-Plus Mobile app for handheld operations.
