

Successful pharmacies rely on RMS.

One of the biggest struggles for a retail pharmacy is keeping track of inventory. Accurately maintaining proper inventory levels, minimizing purchasing errors, and eliminating out-of-stocks are a real challenge for a pharmacy and their bottom line. With RMS' wireless inventory PDA, you are able to leverage technology to improve staff efficiency and your store's profitability!

### How it Works

RMS' Inventory PDA device, based on the Android OS and utilizing a built-in scanner, allows you to achieve many of the time-consuming chores in today's modern pharmacy, such as scanning merchandise for:

- On-hand inventory counts
- Creating purchase orders
- Receiving your daily orders
- Creating shelf labels or signs
- Promo creation
- Manual inventory adjustments (shrinkage)
- Multi-store transfers
- Line busting by scanning a customer's basket prior to reaching the register
- Real-time price changes

Remember, having the tools your staff needs to properly maintain inventory will not only increase customer satisfaction, but will drive store revenue!

### Device Features

- Industrial design, ergonomic, and robust
- 8 hour battery life
- Multi-touch capacitive screen
- Wireless 2.4g 802.11 b/g/n
- 2mb camera with barcode optimization
